Farm Implements and Machinery

College of Agricultural Engineering & Technology
Junagadh Agriculture University,
Junagadh-362001, India.

FOREWORD

**Dr. A R Pathak,
Vice Chancellor,
Junagadh Agricultural University,
Junagadh, Gujarat**

Increasing costs of labour and reducing availability of farm workers make mechanization indispensable. Timeliness of operation, efficient application of fertilizers and plant protection chemicals, reducing the human drudgery and increasing the safety and comfort of farm workers are the main objectives of mechanization.

Numerous manufacturers of agricultural machineries have come forward to make these machineries and market them. The producers also range from small scale producers to very large scale players. Often the farmers and other farm machinery operators do not have access to the knowledge on who produces and what range of products they produce. Due to the lack of such vital information the buyers are forced to buy farm machines based on the availability in the region than based on needs. Making information available on the farm machinery producers is very important for making farm machinery popular in the country.

With this motive, the editor of this compendium has come up with an exhaustive list of farm machinery producers and dealers in the state. The information contained in this compendium will be useful to farmers, extension workers, scientists, students, engineers, manufacturers and teachers. A word of appreciation and congratulations are due to the editor of this highly useful compendium.

Date: November, 2017

Place: Junagadh

(Dr. A. R. Pathak)

FOREWORD

**Dr. N. K. Gontia,
Principal and Dean,
College of Agricultural Engineering and Technology,
JAU, Junagadh**

One of the major constraints of increasing agricultural production and productivity is the inadequacy of farm power and machinery with the farmers. The average farm power availability needs to be increased to minimum 2.5 kW/ha to assure timeliness and quality in field operations.

The Indian Council of Agricultural Research (ICAR) launched the All India Coordinated Research Project (AICRP) on Farm Implements and Machinery (FIM) in 1975 with six centres. The number of centres increased during different Five Year Plan periods and presently there are 25 centres. The addresses of reputed manufacturer/dealers of improved equipment in all across the state will serve as reference material for research and extension workers as well as farmers to bridge the gaps in farm mechanization.

Date: November, 2017

(Dr. N. K. Gontia)

Place: Junagadh

PREFACE

The **Directory of Farm Machinery Manufacturers in Gujarat** is an attempt to make available a comprehensive source of information on various farm machinery manufacturers/dealers in one place. The information has been categorized on the basis of chronology of districts of Gujarat.

During the course of this work, the information provided by manufacturers through their publication, pamphlets, and personal correspondence have widely been adopted and edited. It is hoped that this compilation on farm machinery manufacturers would be welcomed by the farming community, extension workers, scientists, students, engineers, manufacturers and teachers resulting in the increased awareness about availability of farm machinery in different districts of Gujarat and pave the way for their early adoption. The list of manufacturers provided in the directory is aimed at creating a useful interface for direct interaction by the prospective users to further their knowledge and benefit by adopting them.

The information provided in this work has been compiled and every effort has been made to make it as comprehensive and correct as far as possible without favour. However, the inadvertent omission of some of the manufacturers does not imply their exclusion and they are requested to bring it to our notice for inclusion in a future edition of this compilation.

It is my privilege to record deep sense of gratitude to honorable **Dr. A. R. Pathak**, Vice Chancellor, JAU; **Dr. V. P. Chovatia**, Director of Research, JAU, Junagadh. I am very grateful to **Dr. N K Gontia**, Principal and Dean, College of Agricultural Engineering and Technology, JAU, Junagadh and **Dr. C. R. Mehta**, Project Coordinator, AICRP on FIM, Indian Council of Agricultural Research, Bhopal for their motivation and guidance in the preparation of this Directory of Farm Machinery Manufacturers.

I am also thankful to Dr. R A Gupta, Head of the department, Dr. K B Jhala, Dr. M. S. Dulawat, Er. P P Gajjar, Mr. D. M. Pethani, Sh. H. B. Thoriya, and Sh. D. C. Hadvani for their help in bringing out this directory. We are thankful to all those who have helped directly or indirectly in preparing this manufacturers directory.
